Met Office Aberdeen Meteorologist's View
While Monday remains cold and frosty, very cold at height, the wind stays moderate for much of the day before strengthening from the evening. Monday remains the best day to be out for the coming week.

Forecast for Tuesday 03 Jan 2023
Weather: A dry and frosty early start to the day with the best of any clear spells in the east. A band of snow spreads northeast from early morning becoming briefly drier and brighter towards midday. Further outbreaks of rain, to all levels, follow from the southwest from the afternoon.

Maximum wind: Southwest 20-25mph gust 35mph.

Chance of cloud-free hill tops above 800m: 60%

Low Cloud and visibility: Broken cloud with base 800-1000m will become extensive at times lowering 500-700m in snow and rain. Visibility will be good, lowering to very poor in cloud or snow, poor in rain.

Temperature: **Glens:** Minus 2-4 Celsius rising plus 4 Celsius.
At 800m: Minus 1 rising plus 2 Celsius.
Freezing level: 500m rising to 1500m by evening.
